Metric-4.2.2

Institution has remote access to library resources which students and teachers use frequently

During the last completed academic year, a significant percentage of class rooms and seminar halls were equipped with ICT-enabled facilities. These facilities included smart classrooms, Learning Management Systems (LMS), and advanced video and sound systems. The integration of these technologies enhanced the teaching and learning experience, making it more interactive and engaging. Specifically, a substantial proportion of classrooms — often more than 70% — were equipped with these modern tools, ensuring that a majority of students benefited from a technology-enhanced education environment. Seminar halls, particularly those used for larger gatherings or specialized sessions, were also prioritized for ICT upgrades, providing a comprehensive digital infrastructure across the institution. This initiative reflects the institution's commitment to leveraging technology to improve educational outcomes.
