S.No	Name of the Building	No
1	Infront of College	2
2	Back side of college	1
TOTAL		3

Maa Rewati College of Education places a strong emphasis on sustainable water management to support its commitment to a clean and healthy environment. The institution has implemented a well-planned system of reservoirs, tanks, and borewells to ensure a consistent and efficient water supply throughout the campus.

Reservoirs and Tanks:

The college has strategically constructed reservoirs and storage tanks to collect and store water. These reservoirs are designed to capture rainwater, which is then used for various purposes, including irrigation of the campus greenery, maintaining gardens, and other non-potable uses. The stored rainwater helps in reducing the reliance on external water sources, making the campus more self-sufficient and sustainable. These reservoirs and tanks are regularly cleaned and maintained to ensure the water quality remains high and safe for use.

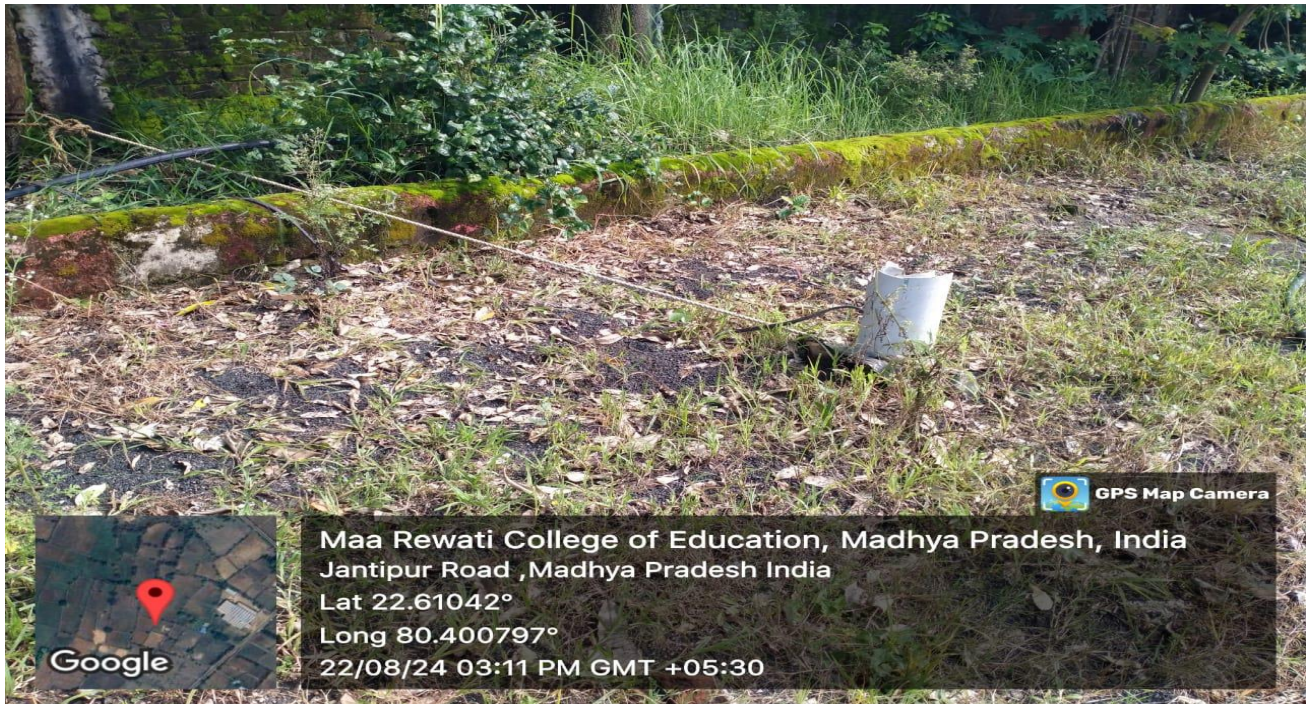

Bore wells:

In addition to reservoirs and tanks, **Maa Rewati College of Education** has also installed borewells to tap into underground water sources. These borewells provide a reliable source of water, particularly during dry seasons when rainfall is scarce. The water drawn from borewells is primarily used for daily campus needs, including sanitation and maintenance. The college ensures that borewells are used responsibly to avoid over-extraction and depletion of groundwater resources.

Sustainable Water Practices:

The college is committed to sustainable water management practices. This includes the careful monitoring of water usage to prevent wastage, as well as the maintenance of infrastructure to ensure efficient operation. The integration of rainwater harvesting with the borewell system also demonstrates the institution's proactive approach to conserving water and protecting natural resources.

Overall, **Maa Rewati College of Education's** reservoirs, tanks, and borewells are essential components of its water management strategy, reflecting the institution's dedication to sustainability and environmental stewardship.
